The Clear-VU EZ Connect™ Filter Air Flow Rates

Please note: The Clear-VU EZ Connect™ Filter comes standard with Buna-N O-rings. EPDM and Viton O-rings are optional and have part numbers that end in a letter related to the material. For example, part# 85190-60-670-E is a filter with FDA EPDM O-rings. The O-ring materials do not affect the flow rate of the filter.

It is the sole responsibility of the system designer and user to select products suitable for their specific application requirements and to ensure proper installation, operation, and maintenance of these products. Material compatibility, product ratings and application details should be considered in the selection. Improper selection or use of products described herein can cause personal injury or product damage.
